Education

Institute of Technology and Management (ITM), Gwalior

Sep 2023 – May 2027

Bachelor of Technology (B.Tech) in Computer Science

Relevant Coursework: Data Structures & Algorithms, DBMS, OOPs, Operating Systems, Computer Networks, Computer Architecture

Experience

Java Full Stack Developer Virtual Internship

Oct 2024 – Dec 2024

Institute of Technology and Management, Gwalior – Remote

- Learned core Java concepts including OOP, Collections Framework, and Exception Handling.
- Developed small Java-based applications and improved debugging/problem-solving skills.
- Practiced backend development fundamentals and object-oriented programming concepts.

AI-ML Virtual Internship

Jan 2026 – Mar 2026

EduSkills (Supported by Google for Developers) – Remote

- Worked with Python libraries such as NumPy and Pandas for data analysis tasks.
- Implemented machine learning models including regression and classification algorithms.
- Completed practical assignments focused on ML workflows and model evaluation.

Projects

PassOP – Password Manager (Full Stack)

GitHub

ReactJS, Node.js, Express.js, MongoDB, TailwindCSS

- Built a secure full-stack password manager with complete CRUD functionality.
- Implemented authentication and encrypted password storage for improved data security.
- Developed RESTful APIs for efficient backend communication and user data handling.
- Designed a responsive UI using TailwindCSS with optimized user experience across devices.

TaskForge – Task Management Web App

GitHub

ReactJS, JavaScript, TailwindCSS

- Developed a dynamic task management application with add, edit, delete, and task status features.
- Managed real-time UI rendering using React state management and component-based architecture.
- Improved frontend responsiveness and usability with a clean TailwindCSS interface.

Bug Tracker System

GitHub

HTML, CSS, JavaScript

- Built a bug tracking system for logging and managing software issues efficiently.
- Implemented issue filtering and status tracking functionality using JavaScript.
- Improved frontend interactivity through DOM manipulation and event-driven programming.

Technical Skills

Languages: Java, JavaScript, HTML5, CSS3

Frontend: ReactJS, TailwindCSS, Bootstrap

Backend: Node.js, Express.js

Database: MongoDB

Tools & Platforms: Git, GitHub, VS Code

Core CS Concepts: Data Structures & Algorithms, DBMS, OOPs, Operating Systems, Computer Networks

Achievements

- Solved coding problems on LeetCode and continuously improving problem-solving skills.
- Built multiple full-stack and frontend projects using the MERN stack.
- Active GitHub contributor with hands-on experience in modern web development technologies.
